

INTELLIGENCE

Building Automation System

Features

- **Cost Effective Lighting Dimmer Expansion**
- **16 X (0-10VDC) or (4-20mA) Outputs**
- **Easy Installation**

The INTELLIGENCE LCUX-100AO Lighting Dimmer Expansion Module provides for a convenient and cost effective mean to add a dimming control points to IP Based lighting controller model LCU-100

LCUX-100AO (Lighting Dimmer Expansion Module)

The LCUX-100AO provided 16 X (0-10VAC/0-20mA) expandable for IP Based Lighting Controller model LCU-100IP. Each Output can be used to send 0-10VDC or 0-20mA signal to lighting dimmer unit that can control the lighting dimming through a software configuration.

Installation

The LCUX-100AO Lighting Dimmer Expansion Module is designed to be plugged into an expansion port founded at the bottom of LCU-100IP by using multi pair cable.
