

### Features

- **Programmable**
- **Ideal for 2 Way Local/ Remote Lighting Control**
- **LED Indicator Built-in For Lighting Control Status**

The **DS Series** is a cost effective programmable local switch which can be connects directly to LCU-100 IP Based Lighting Controller for local control via two wire RS-485.

**"INTELLIGENCE"** DS Series Programmable Local Switch contains eight digital momentary switches. Each can be programmed for individual relay control, group relay control , pattern relay control or dimmer control for a wide variety of Lighting Control Application.

As a general purpose, these devices are ideal for applications where 2 way control are required for control building equipment via these local/remote switches or via preprogramed On/off Time Scheduling from master control unit.

## INTELLIGENCE

### Model DS Series

Programmable Local Switch

### Specifications

<b>Power</b>	24 VDC
<b>Communications</b>	1 X RS-485 to LCU-100
<b>Communication Speed</b>	1200 to 19.2 K buad
<b>Bus Length</b>	4000 ft. using twisted Pair Cable with shielded.
<b>Lighting Control:</b>	1/2/4/8 Momentary Switch with LED Status
	Each Switch can be Program as Individual, Group or Pattern Lighting Control
