INTELLIGENCE
Model LCUX-100DO
Power Relay Expansion Module

The INTELLIGENCE LCUX-100DO Relay Expansion Module provides for a convenient and cost effective mean to add control points to IP Based Web Server Universal controller model LCU-100

LCUX-100DO (High Power Relay Expansion Module)

The LCUX-100DO provided 16 Form A relays rated for 20 Amp. At 24 VDC/VAC operation expandable for IP Based Universal Controller model LCU-100. Each Relay can be programmable and used for directly on/off control for lighting or any application that needs a high power relay.

Installation

The LCUX-100DO Relay Expansion Module is designed to be plugged into an expansion port founded at the bottom of LCU-100IP by using multi pair cable.

Specifications

LCUX-100DO (Lighting Relay Expansion Module)

Outputs	16 X 20 Amp. Form A Relay
Cpntact Rating	20 Amp.
Power Supply	24 VDC
Power Consumption	100 mA (All Relays off)
	700 mA (All Relay on)
